## Jordan Field

Tocil flat 58L University of Warwick Coventry CV4 7ES

M +44 7803 323 947

j.field.2@warwick.ac.uk jordanfield.uk

My main focus in life is one of quality. When I am given a task, I will always strive to not only complete what is expected of me, but do it in a way that makes what I have done great.

Work Experience

Fujitsu Technology Solutions • Summer 2016

Shadowed a number of departments in both the Bracknell and Stevenage campuses, including software development, server administration, and customer relations. Gained a valuable insight into the development, deployment and subsequent support of a software solution.

Education

**The University of Warwick •** October 2017 – Present – June 2020

Studying BSc Computer Science with a German module.

Sir Joseph Williamson's Mathematical School • A-Level • September 2015 – June 2017

GCE Mathematics (Edexcel)	A*	AS Further Mathematics (Edexcel)	В
GCE Physics (Edexcel)	Α	AS Politics (Edexcel)	В
GCE Computer Science (AQA)	Α	Extended Project Qualification (AQA)	В

Sir Joseph Williamson's Mathematical School • GCSE • September 2013 – June 2015

Mathematics	Α*	Physics	Α*	English Language	Α
Further Mathematics	A*	D&T: Product Design	Α	English Literature	Α
Biology	A*	German	Α	Religious Studies	Α
Chemistry	<b>A</b> *	Computer Science	Α	History	Α

Skills

## **Computer programming**

I have been practicing computer programming since I was roughly 14 years old. In that time, I have developed a wide knowledge of the Python programming language, completing a number of projects using it. I am also quite well versed in the new Swift programming language used to develop iOS and macOS applications. I am in no way an expert – that's what my degree is for – but I think I would be an effective junior programmer in a team at this stage.

## IT Skills

Going hand-in-hand with the programming skill, I am also knowledgeable in a wide variety of general IT topics including troubleshooting, disk management and data backups. There are a number of people that use me as their first point of contact if they don't know how to do something with their devices, and I always try my best to help them.

## Speaking to others

My peers and friends often remark about my politeness. I don't really pick up on it myself – I act in a way that I find acceptable. I also feel like I would work well in a customerfacing scenario, since I am always comfortable talking to new people.
